

humimeter **BL2** universal biomass moisture meter

Measuring instrument with insertion probe for wood chips, ram electrode for round timber and split logs or special probes

For the measurement of round timber, split logs, wood chips, sawdust, pellets, hay and straw bales.

Your benefits

- High measuring range up to 60% water content (depending on the material)
- Different measuring probes for measurements up to a depth of 1 meter available
- Measurement within seconds
- Quality control and documentation everywhere on site

humimeter **BL2**

- Optional: humimeter USB data interface module with LogMemorizer measuring data recording and analysing software on CD incl. USB cable for PC, printer and wooden case
- Menu languages: English, German, Italian, French, Spanish and Russian

technical data:

Only an **exact moisture measurement** of biomass, round timber and split logs allows fair payment for producers, suppliers and end customers. The moisture content determines the fuel value of the wood. This makes quality control in the manufacturing and supplying of biomass increasingly important. Using a high quality biomass moisture meter you can prevent machine problems and be sure that you do not buy water at a high product price.

With the **humimeter BL2 universal biomass moisture meter** you can perform this procedure easily and in seconds. The lighted display shows the water content immediately. The measurement values can be stored on the instrument and sent to a portable printer or PC if required.

To avoid very costly mistakes due to incorrect moisture levels it is necessary to check the moisture of a material in the manufacturing and treatment process in order to be able to take suitable measures in time.

Due to its longstanding experience in this field and constant research, **Messtechnik Schaller GmbH** has attained the **highest quality** in the development and production of air humidity and material moisture meters for **professional applications**. Our main areas are: **climate, environment, food, bioenergy, buildings, paper, board** and **various other materials**.

More than 40 000 customer-specific solutions have been designed and produced for industry and university institutions all over the world so far.

Our technicians provide reliable support and are available to answer your questions.

humimeter BL2 universal biomass moisture meter

For the measurement of round wood, split logs, wood chips, sawdust, pellets, hay and straw bales

article no. 12109

- Resolution: depending on the sensor
- Measuring range: depending on the sensor up to 60% water content (depending on the material)
- Automatic temperature compensation
- Temperature measurement: depending on the sensor
- Temperature can be set to °C or °F as required
- Measurement within seconds
- Hold function, manual saving of results, datalog for 10.000 logs with measuring point report
- Supplier's data can be recorded
- Large, well-lit LC display
- With rubber protection cover and batteries
- Optional: humimeter USB data interface module with LogMemorizer measuring data recording and analysing software on CD incl. USB cable for PC, printer and wooden case
- Required accessories: measuring probes
